

VISION 2006 CONFERENCE UPDATES

EVENT	TYPE	CHANGE / UPDATE
W16 OPENLink™ Base W44 OPENLink™ Toolkit	Updated content	These are new workshops. While they are named the same as last year's two OPENLink™ workshops, they both have brand new content for Vision 2006. Please refer to the "Workshop Abstracts" document for details.
F2	Topic change	<p>MATERIALS MANAGEMENT FILE VERIFICATION</p> <p>Jean Nigro, Systems Specialist Asante Health System</p> <p>The concept of verifying data in the Item Master, Item Location File, and Item Supplier File will be discussed. Twenty-four verifications will be presented with the rationale for verifying the data in each. Sample queries will be handed out for use as recipes in creating your own file verification queries using your data.</p> <p>AUDIENCE: Anyone interested in feeling confident that Item files are built correctly, Knowledge of 400 Query will be helpful, but not necessary. IT could use this information to create custom file verification queries for the attendee.</p>
